Need help connecting to your personal site?

Logging in is easy.
Enter your server code or your e-mail address and your company number followed by your password.

Logging in for the first time?
Enter your server code and the company number you received by e-mail(1) or your e-mail address(2), then enter your temporary password. Then follow the guidance to complete your profile (personalise your password, add your mobile number...).

You haven’t received your password or you have forgotten it?
After entering your server code and your company number or your e-mail address on the log-in page of your personal site, you can request a new password by clicking on the link «Password not received or forgotten» and following the instructions.

Your new password will be sent to you:
- immediately by text message (if your mobile phone number has been registered) by clicking on the button “Send the password by text message”.
- immediately by e-mail (if your e-mail address is confirmed) after a response to your secret question.
- otherwise, by mail to your home (a few days, depending on your location).

You can also think about connecting via the mobile application “My Employee Savings”, available on smartphone or tablet (iPhone, iPad and Android).

Download it now!
On a smartphone or tablet, go directly to:

You can log in with:
- your e-mail address as an identifier,
- your digital fingerprint with Touch ID (only on iOS, from iPhone 5s and up).

Otherwise, get your ID information (company number, server code number and password) and log in.

---

(1) Sent by mail if your employer has not communicated an e-mail address to Natixis Interépargne.
(2) Your e-mail address is the one that may have been sent by your employer to Natixis Interépargne. You can change it when you complete your profile. Otherwise, if your employer has not communicated an e-mail address, enter your server code.
